

# EHCCS

## Supplementary Information Form 4

(To be submitted only on or before 15th of April and October each year)

### Clinical Incidents

Period					
		Total no. of Incidents		Total no. of Service Users involved in Incident	
		Moderate	Severe	Moderate	Severe
(i)	Fall-related injuries <sup>Note 23</sup>	10	3	8	3
(ii)	New skin breakdown <sup>Note 24</sup>	2	0	2	0
(iii)	Unplanned admission into hospitals <sup>Note 25</sup>	39	10	35	10
(iv)	Unexpected death <sup>Note 26</sup>	0	0	0	0
(v)	Infection reported <sup>Note 27</sup>	9	7	8	6

\* Delete as appropriate

Note 23 : Fall-related injuries means injuries caused by falls as a result of a sudden, uncontrolled, unintentional and non-purposeful downward displacement of body to the floor or other surface lower than the body. The injuries can be in a wide range of severity levels, from trivial injuries to a severe life threatening trauma. All treated and untreated fall-related injuries should be reported.

Note 24 : New skin breakdown means the occurrence of skin damage after admission to EHCCS which may be caused by a variety of reasons, including trauma, arterial insufficiency, venous insufficiency, excessive pressure over part of the body and diabetic neuropathy. All new skin breakdowns, except those caused by falls and infection, should be reported.

Note 25 : Unplanned admission to hospitals means non-referred and non-scheduled hospitalisation due to unexpected illnesses, health problems or injuries that require urgent in-patient treatment. All unplanned admissions, except admission to Observation Ward of A&E Department, should be reported.

Note 26 : Those death cases where no special observation is noted during the previous visit prior to the user's death.

Note 27 : Infections mean invasion of the body by pathogenic microorganisms and their multiplication which can lead to tissue damage and disease. All infections, except upper respiratory tract infections, should be reported.
