## **1. Overview**

In response to the tremendous increase of the ageing population, Evangelical Lutheran Church Social Service - Hong Kong (ELCSS-HK) applied the Chief Executive's Community Project List 2017 and successfully got the grant to develop “Lifestyle Reactivation Project: Jockey Club Smart Homecare Solution”. The project is to make the good use of technologies and IoT (Internet of Things) devices plus the inputs from healthcare professionals, re-engineer the lifestyle of frail elderly and empower their caregivers, assisting them to continue living in their familiar domestic environment and community as long as possible. Establish a new homecare service model for frail elders at ELCSS-HK and also deploy to other NGOs in the future.

To fully utilize the advantage of the Lifestyle Reactivation System (Android-based) app system, the project team propose to develop a cognitive training app for providing a comprehensive computer-based cognitive training system for Chinese elders. Besides, the training system should also develop an administration console for facilitating agencies to manage the performance and progress of members in the Brain Training System. As the whole project sustainable in the future, this Brain Training System can be a standalone app and will become fee-charging service for worldwide Chinese people.
